

## CCHIT Certified

The Certification Commission for Healthcare Information Technology (CCHIT) has certified that CareRevolution meets CCHIT ambulatory electronic health record (EHR) criteria.

Certification means CareRevolution has been tested by CCHIT and passed 100 percent of a comprehensive set of criteria for functionality, interoperability and security.

CCHIT is tasked by the Department of Health and Human Services to develop criteria for certification of EHRs.

## TEPR Pediatric Honors

The Medical Records Institute presented CareRevolution with **1st Honors** in the *Pediatric Recognition Program* competition at TEPR (Towards an Electronic Patient Record), MRI's annual conference.

Vendors participating in this competition had to demonstrate their ability to meet pediatricians' special requirements for documenting children's growth and tracking their health progress.

*Cleanly  
Integrated*

**CareRevolution**

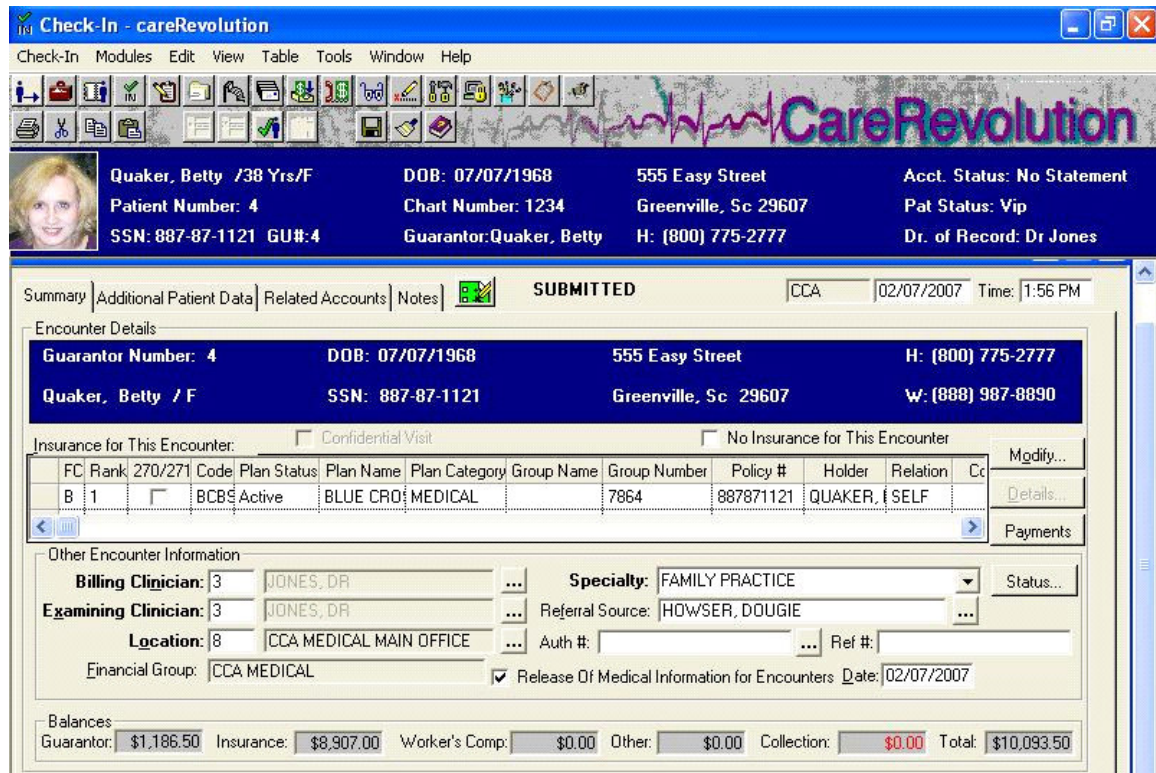

**Practice Management Software**  
**Electronic Medical Records**

# Integrated, not interfaced

The tag line on the front of this brochure reads “Cleanly Integrated” with the point being that as an integrated software product, **CareRevolution** operates within a single Oracle database. Both the practice management and the electronic medical record functions work together for maximum efficiency and speed.

Combine the strength of the integrated Oracle database with the comprehensive functionality available in **CareRevolution** and you have a product that is truly full-featured.

- ◆ **Billing including electronic insurance claims, remits, eligibility and patient statements**
- ◆ **Patient flow**
- ◆ **Clinical knowledge base**
- ◆ **Collections and authorizations modules**
- ◆ **E & M Code Advisor**
- ◆ **Imaging and insurance card scanning**
- ◆ **Modifiable clinical note templates**
- ◆ **Organizer for appointments, phone calls, alerts, messages and flags**
- ◆ **Rules-based scheduling**

## Practice Management

*At Check-In, the user is presented with patient demographic and insurance information along with current balances and alerts related to collections, recalls and eligibility.*

## Electronic Medical Records

*Tabs identify the array of information directly available to the provider.*

*Displayed is the clinical note associated with the selected encounter.*
