

Electronic Medical Records

A quick glance at any practice will reveal significant space and staff activity being dominated by patient charts. Large chart rooms contain thousands of charts which are pulled, transported, tracked and re-filed by the staff. Comparing the manual chart handling procedure to the high levels of technology available in other practice areas, the most sensitive and important data is being handled by the most archaic office system.

To put your chart system on a technological par with your other systems, CCA MEDICAL offers **ChartRevolution**, an Electronic Medical Records product from Electronic Healthcare Systems.

Beginning with the physician's desktop (shown below), the physician is presented with all critical patient information in order to quickly review progress notes and interventions from previous visits. From this point on, the physician has a choice of 5 different methods of entering data into the chart; in other words, in a multi-physician practice, each physician has the freedom of choosing his/her method of input:

Significant Benefits

- ◆ Reduce Transcription Costs
- ◆ Improve Patient Throughput
- ◆ Eliminate Lost Charts

Major Functions

- ◆ Clinical Knowledge Base
- ◆ User-defined Clinical Note Templates
- ◆ Wireless Input Devices Accepted
- ◆ Graph Vital Statistics
- ◆ Remote Access
- ◆ Automated Prescriptions
- ◆ Voice Recognition

- ◆ **Voice Digitization**—Create a voice file and send it to a transcriptionist for entry.

- ◆ **Electronic Voice Recognition**—Dictate directly into the chart.

- ◆ **Clinical Knowledge Database**

- ◆ **Combination of Voice and Knowledge Database.**

- ◆ **User-defined Checklists.**

Current Problems		Orders		Encounters						
#	Identified	Description	D	R	A	Performed	Description	Recommend	Date	Chart Complaint
23	04/05/2000	Abdominal Hern				06/18/1998	Urinalysis	06/18/1998	06/26/2001	Interventions
20	03/10/2000	Lenoir's Spur				06/18/1998	CBC	06/18/1998	05/01/2000	
19	03/08/2000	Femoral Hernia				05/04/1998	Urinalysis	05/04/1998	05/01/2000	
18	03/08/2000	Diabetes Mellitu				05/04/1998	CBC	05/04/1998	05/01/2000	
						04/16/1998	CBC	04/16/1998	05/01/2000	
						04/13/1998	Blood sugar	04/13/1998	05/01/2000	Problems
						04/10/1998	CBC	04/10/1998	04/17/2000	
						04/03/1998	Blood sugar	04/03/1998	04/12/2000	
						03/20/1998	CBC	03/20/1998	04/12/2000	
						03/21/1998	Urinalysis	03/20/1998	04/05/2000	
						03/17/1998	CBC	03/17/1998		

Major Features

- ◆ Interfaced with Practice Management Systems
- ◆ Clinical Knowledge Base
- ◆ Modifiable, Mergable Clinical Note Templates
- ◆ Physician's Desktop
- ◆ Imaging
- ◆ Accepts Hand-Held, Wireless Input Devices
- ◆ Voice Recognition Interface
- ◆ Telephone Messaging
- ◆ Electronic Signature
- ◆ Pediatric Growth Charts
- ◆ ACOG Form for Obstetrics
- ◆ Graphing of Vitals
- ◆ User-written Checklists
- ◆ E & M Code Advisor
- ◆ Immunization Tracking
- ◆ Automated Prescriptions—May be Faxed, Emailed or Printed
- ◆ Problem Oriented Case Management
- ◆ Flow Sheet
- ◆ Drug Interaction Database
- ◆ Data Security and Confidentiality Levels
- ◆ Web-Based Training and Support
- ◆ Classroom and On-Site Training Classes
- ◆ Telephone Support
